IN THE CLAIMS

Please cancel claims 21-22 without prejudice and amend the remaining claims

as follows:

19. (Amended) A silica-soda-lime glass composition comprising the following components:

SiO₂ 55-75%

Na₂O 2-10%

CaO 4-12%

Al₂O₃ 0-7%

ZrO₂ 0-8%

K₂O 0-8%

MgO 0-4%

B₂O₃ 0-3%

wherein the glass composition has [having] a ϕ coefficient of between 0.5 and 0.85
 $N/(mm^2 \bullet ^\circ C)$ [$N/(mm^2 \cdot ^\circ C)$], a working point of less than 1200 $^\circ C$, a thermal expansion
coefficient α_{20-300} of between 60 and 88 x 10 $^{-7} \cdot ^\circ C^{-1}$, and a strain point of greater than 570 $^\circ C$.

24. (Amended) The composition of claim 19 wherein the ϕ coefficient satisfies the relationship

$$[0.7MPa^2 / ^\circ C^2 < \phi^2 \cdot c/a < 2MPa^2 / ^\circ C^2]$$

$$0.7MPa^2 / ^\circ C^2 < \phi^2 \bullet c/a < 2MPa^2 / ^\circ C^2$$
